

Name: Allyson Eduardo Ferreira Batista

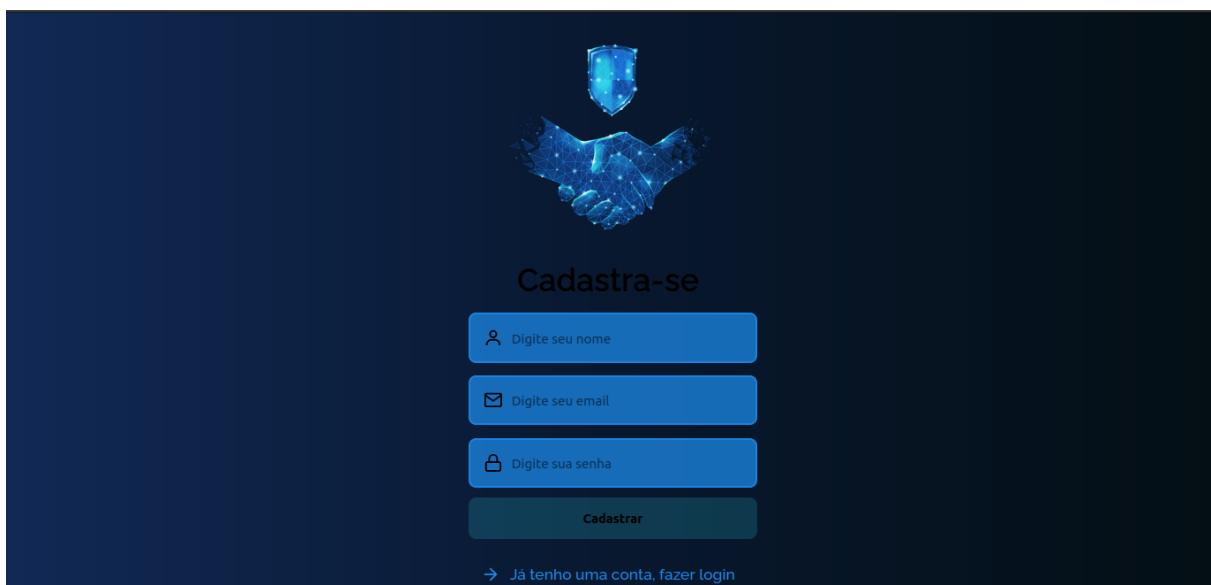

Name of project: Ally

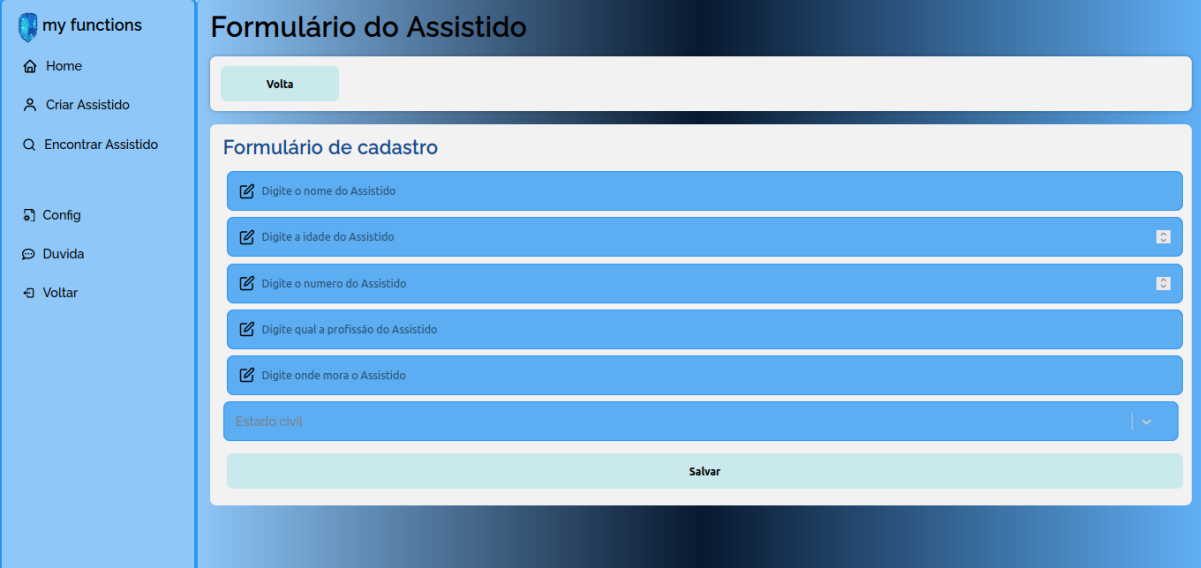

The Ally project is about registering people who will receive a basic food basket at the Sociedade São Vicente de Paulo headquarters.

The application aims to register people who receive the basic basket, we developed this idea after the secretary of the São Vicente de Paulo sed commented that he did not want to store the data of the people who receive the basket in papers, with that I created this application.

The target audience will be the people who receive the baskets with their registration.

In order to navigate through the application, there will be a main user who will be registering the Assisted Persons who receive the baskets, so this user will have to have a unique registration to be able to access the application. With the registration done, he will be logging in, with that the user will be accessing the application. Inside will be the tabs where the main user will be registering the assisted who will receive the baskets.
